
Project:

Centrica Storage Limited, Bridgehead, Hull.

Contract value:

£1.9m

Client:

CSL Centrica

Contractor:Ben Johnson Interiors

An exceptional Cat B fit out in a Voronoi theme over the entire interior of a brand new office facility for Centrica Storage Limited in Hull.

The interior of this modern facility echoes a Voronoi theme, reflecting how natural gas is stored within rock structures. This Voronoi theme carries through all elements of the project including the reception, office areas, meeting rooms and breakout spaces.

Meeting the clients brief, the scheme brings elements of the 'outside' into this brand new facility through the use of Walnut wood effects, and a range of natural colours.

The Voronoi theme carries through from the back lit reception, main office partitioning and has been reflected in many key features including the circular screens around the curved booth seating within the open plan areas.

A central spine design with meeting rooms and break out spaces located in the centre of the space dominates the spatial design concept. This gives fantastic natural light and views out for the people working in the space, who can, as a consequence, be located around the perimeter.

Folding sliding walls, glazed central meeting rooms, generous break out spaces and acoustically treated private conversation booths combine to create a modern, vibrant and inspiring office environment.

 **Modern, Vibrant, Creative Interior** **Full building fit out - including FF&E**

"We are absolutely delighted with the space designed by Box Architects, it has exceeded our expectations on every front"

Trisha Parkinson, Property Manager, Real Estate & Facilities Management, Centrica
